

Water-in-Oil (W/O) Broad Spectrum Protection Daily Facial Moisturizer

Description: This light-feeling formulation uses Zemea[®] propanediol to maintain solubility and fluidity of the water-soluble sulisobenzone UVB/UVA absorber as the formulation water evaporates on the skin, to provide moisturization benefits, and to enhance freeze/thaw stability. The specially-coated zinc oxide is designed to offer highest levels of broad spectrum protection, transparency, and dispersibility. The W/O platform, stabilized by a PEG-free emulsifier, offers inherent water resistance. The emollient phase contains both volatile and solvent/emollient components, generating light application properties and the ability to incorporate other organic sunscreen actives.
